The **eMEETplus** comes in two different versions to serve two different purposes in a better way.

1. eMEETplus C1000: Enterprise conference solution. For general conferencing, corporate meetings, communication among off shore production and sales facilities, Web portals, etc. It supports up to 17 video windows.

2. eMEETplus L1000 : Long-distance education solution. For e-learning, training, customer support, online event etc. It supports two video windows and maximum of 40 user can join a single conference session.

b. Server

The **eMEETplus** conference server is a robust, future-proof video conferencing server to meet the end-to-end solution for both B2B and B2C scenario. It supports, theoretically, an unlimited number of concurrent client connections. Its high availability and reliability characteristics make it a perfect choice for any sort of audiovisual conferencing need. It is highly scalable to fit to any heterogeneous network condition. Very easy to install, configure and manage, the server system supports both the server distributed and P2P connection mechanism.

The following server modules are available:

Sl. No.	Server Type	Number of concurrent users that can be served	Targeted area of Use	Remarks
1	Small	10 25 50	Personal, home office and small business entity. In house use for corporate	Only one server machine is required.
2	Medium	100 250	Mid range commercial, portal sites and business entity	Only one server machine is required.
3	Large	Up to 1000	Commercial portal sites ASP platform, large corporate	2 or 3 server machines are required.
4	Special	Over 1000	Commercial portals and special purposes	Several server machines are needed.

Server system requirements

The server system runs on MS Windows server family (Win 2000 and 2003 server family) and Linux platforms.

The following is the minimum requirement for **eMEETplus** conference server. The actual configuration depends on the number of required concurrent users.

- 1) Operating System: MS Windows 2000 and 2003 server family, Linux
- 2) DBMS : MySQL
- 3) Web Server (For Administration Tool): Apache with PHP support.
- 4) 2 GHz Pentium iV Processor or faster
- 6) 512 MB of RAM or more (depends on the capacity to serve clients concurrently)

(Details H/W and S/W requirements for both client and server can be available by contacting support@neotechsoft.co.kr).

c. Server Administration Tool

A web based easy-to-use administration tool comes along with the system. This tool allows you to manage the system, like user management, conference room management, databases management and so on.

Software Shipping

Regardless of the number of concurrent user, every sale ships with the following items in a single CD ROM.

- 1) Client Software: Client install program
- 2) Server Software: Installation Software for server along with other necessary software and documents.
- 3) Administration Tool: To be shipped along with the server software.
- 4) Documentation: Client manual, Server operation manual, quick reference guide and other related document to be shipped along with the corresponding software.

Support and Maintenance

Our support team is ready to provide any sort of technical support. The support is provided within 24 hrs of reporting a problem. However, Neotechsoft is ready to provide you emergency support in case of urgency. A regular routine check and maintenance job will be done (if available) also for the server product. A separate "After Sales Support and Maintenance Contract" can be supplied after the completion of any sales agreement.

Documents and Manuals

The detailed operation and maintenance documentation (both for client and server software) along with other supporting materials will be supplied with the software.

Warranty

Twelve (12) months of warranty period for both client and server software. All necessary support shall be provided during this warranty period including bug fixation, client and server setup, server operational assistance, server recovery, etc.

Up Gradation

Free up gradation shall be provided for all minor software up gradations during the period of warranty. However, proper charge may apply for major up gradations. Please contact our sales team for more details.

Costs

a. Customization Cost:

- ✓ **Non-customized:** Free of charge.

The software is provided as it is. No functional and GUI changes are available.

- ✓ **Customized:** needs additional charge for customization.

The customization means you need some functional deletion, addition or alternation. In this case, depending on your requirements, some of man-hours will be needed to customize it. So, we will charge additionally depending on the required modification.

However, minor customization can be done for free.

b. Solution Price

The solution price includes the client software, server software, administration tool and all related documents. The price is mainly depended on the number of concurrent user for the server. The number of concurrent user for the server indicates the number of users who can connect to the server at a given time. For additional client access over the count of server's concurrent users, additional charge shall be applied. The listed prices are valid for non customized solution. To get a pricelist, please contact our sales team (sales@neotechsoft.co.kr) along with your requirements, like, number of concurrent users, required customization etc.
